

## FIRST AID AND MEDICAL ATTENTION

Occupational Health Supervisor - 2011 Room 107  
(If no answer dial Ext. 9)

### FIRST AID ATTENDANTS

Carlton L (Laurie)	2266	H/O 427A
Duckworth M (Murray)	2424	H/O 3rd Stn
Spilar Miss J (Jenny)	2284	H/O 5th Stn
Kershaw I (Ian)	2657	H/O 092
Day Miss J (Julie)	2657	H/O 092
McCarthy J (Jean)	2316	Lab 420
Walker A (Andrew)	2257	Lab 002
Stewart G (Geoff)	2203	Lab 204
Ennor B (Bruce)	2203	Lab 204
Smith K (Kevin)	2038	Lab 306
Battershill G (Gary)	2211	HIGH ST 003
Everitt A (Allen)	2345	HIGH ST 003
Knudsen L (Leanne)	2812	HIGH ST 004
Campbell B (Bruce)	2207	HIGH ST 002
Blundell M (Mark)	2610	PRIN 301
Anderson K (Kristina)	2332	PRIN 201
Michaud P (Paul)	2176	PRIN 201

### IN CASE OF EMERGENCY :

1. Seek help
2. Reassure and keep patient calm
3. Treat for shock
4. Keep patient warm and comfortable
5. Loosen tight clothing
6. Look for cause of injury

### SUSPECTED HEART ATTACK :

1. Call for ambulance.
2. Call an experienced first aid attendant.
3. If patient is breathing, lie on one side to maintain a clear airway.
4. If patient is not breathing commence Cardio-Pulmonary Resuscitation.

### FITS (Epilepsy) :

1. Turn patient onto one side.
2. Do not try to force anything between the teeth.

### PROFUSE BLEEDING :

Firmly press a pad of clean material against the wound.

### ELECTRIC SHOCK :

1. Switch off current or remove patient from contact with electricity using a loop of DRY clothing, rubber or rope.
2. Cardio-Pulmonary Resuscitation may be necessary.

### CHEMICALS IN EYE :

Keep flushing eye with clean water. Cover with eye pad and transport immediately to the Eye and Ear Hospital.

### BURNS :

Bitumen, Asphalt : Do not try to remove any substance adhering to skin.  
Chemicals : Remove any contaminated clothing and keep flushing the burned area with CLEAN WATER.  
Fire, Heat Burns : Do not remove clothing or break blisters or scalds. Continue flushing with water.

## AVAILABILITY OF FACSIMILE AND TELEX FACILITIES

### FACSIMILE

Facsimile units have been installed at the following RCA offices -

#### Head Office

- Main Building (5th Floor Sth)	(03) 862 1181
- Executive Services (5th Floor Nth)	(03) 862 3532
- Legal Services (3rd Floor Nth)	(03) 862 3619
- Property Services (3rd Floor Nth)	(03) 862 3619
- Emergency Services (Grd Floor)	(03) 862 3361
- Laboratory Building (Asphalt 3rd Floor)	(03) 862 3002
- 89 High St (Road Vehicle Limits 5th Floor)	(03) 862 2997
- 1 Princess St (Bridge Branch 2nd Floor)	(03) 861 9112
- 17-27 Cotham Rd (Survey & Mapping)	(03) 862 3537
- Coburg Laboratory	(03) 354 5176
- Plant Branch (Glen Waverley)	(03) 233 0141

#### Regional Offices

- Barwon	(052) 21 6102
- Central Gippsland	(051) 74 6729
- Central Highlands	(053) 33 1250
- Dandenong	(03) 877 6686
- East Gippsland	(051) 52 5358
- Metropolitan	(03) 859 6327
- North Eastern	(057) 62 4980
- Northern	(054) 41 3169
- South Western	(055) 62 9827
- Wimmera-Mallee	(053) 82 0546

#### Project Offices

- Baddaginnie - Bowser	(057) 62 4851
- Chiltern Site Office	(057) 26 1221
- Genoa	(051) 58 8287
- Greensborough	(03) 434 4405
- Malvern	(03) 211 1900
- West Gate Freeway	(03) 646 4158
- West Gate Freeway (Precast Yard)	(03) 646 5353
- Wodonga	(060) 24 3856

In addition, facsimile communications may be made with the Ministry of Transport and with any other organisation equipped with facsimile. Enquiries may be directed to the Office Systems Section (ext. 2284) or to the operator (ext. 2369)

### TELEX

The RCA has Telex machines installed at the following locations for use in general.

Location	Telex No.
Emergency Services (Head Office)	32327
Head Office (5th Floor Sth)	31650
West Gate Freeway	151156

The Telex operators at the respective locations will provide information on all aspects/requirements of Telex messaging. Copies of the Telex directory are also held by the Telex operators.

## FIRE ORDERS HEAD OFFICE BUILDINGS

### 1. FIRE ALARM BUTTONS AND FIRE APPLIANCES

Fire alarm and fire fighting appliances are located on or near each staircase and additional fire alarms and appliances are sited in various parts of the buildings. Make yourself familiar with the location of those nearest to your normal workplace.

### 2. EMERGENCY CONTROL ORGANISATION

For each building there is a nominated Building Emergency Controller, Deputy Building Emergency Controller and Fire Wardens.

The nominated officer for this building and location nearest you are:

Building Emergency Controller	1	_____
Deputy	2	_____
Floor Warden	3	_____
Deputy	4	_____
Warden	5	_____
	6	_____
	7	_____
	8	_____

(In space above, please insert names of officers)

- (a) Fire wardens will assume control in all emergencies during normal office hours (8.30 a.m. to 4.51 p.m.) excluding the lunch period (12.45 p.m. to 1.30 p.m.). Staff are to co-operate with the fire wardens and comply with their instructions should an alarm be activated.
- (b) In most cases fire or smoke will be detected automatically by the detection equipment installed throughout the buildings. The fire alarm will operate under such conditions and, in turn, activate the building's warning system and set into action a train of "fail safe procedures". This system will, in turn, sound the "alert" signal and unless the system is switched to "manual" operation at the Emergency Control Centre will, after a delay of 90 seconds, sound the "evacuation" signal. Therefore during normal office hours any emergency or evacuation procedure will be controlled by officers of the Emergency Control Organisation. Outside normal office hours staff are to evacuate the building immediately if an "evacuation" signal sounds.

NOTE: Under no circumstances are the lifts to be used.

### 3. ALARMS

Two types of alarms may be heard in the buildings these are:-

#### (a) Fire bells

One or more fire bells are fitted in each building. Bells will ring if any break glass alarm, detector, or sprinkler head is activated.

#### (b) Warning Signals

- (i) The "alert" signal - a repetitive, interrupted tone of 420HZ to alert staff that an emergency exists or is suspected.

NOTE: The "all clear" will be given as soon as possible and will be stated verbally over the loudspeaker system.

- (ii) The "evacuation" signal - a frequency modulated tone increasing from 500HZ to 1200HZ to advise evacuation of the floor/building. (This signal will normally not be sounded during office hours.)

4. In the event that smoke or fire is detected by an individual officer, additional positive action, as detailed below, will be required.

### 5. ACTION BY THE PERSON DISCOVERING THE FIRE (or smoke)

- Break the nearest break glass alarm and press the button.
- During normal office hours (8.30 a.m. to 4.51 p.m.) notify a Fire Warden. (This may, or not, be possible between 12.45 p.m. and 1.30 p.m.).
- If reasonably able to endeavour to control or extinguish the fire and on the arrival of officers of the Emergency Control Organisation (or Metropolitan Fire Brigades) carry out their instructions.
- Close all doors and windows nearby to retard the spread of fire.
- Switch off all electrical appliances and equipment.

NOTE: In the event that there is imminent danger to life, the area must be evacuated immediately.

### 6. ACTION BY ALL OTHER STAFF (upon hearing the fire bells or warning signals)

#### (a) During normal office hours (8.30 a.m. to 4.51 p.m.):

- (i) Alert signal - Fire wardens report to their respective control points, all other staff remain in their work area and await instructions from the fire wardens. Staff shall keep movement to an absolute minimum and limit the use of telephones to essential calls only.

NOTE: During lunch period (12.45 p.m. to 1.30 p.m.):

If there is an alarm during this time, fire wardens should report to their respective control points to assist in the safety and protection of members of the staff.

- (ii) All clear - The Building Emergency Controller will advise staff over the loudspeakers when the emergency is over. Normal activities may then be resumed through-out the building.

#### (b) Outside normal office hours (including the lunch period 12.45 p.m. to 1.30 p.m.):

- (i) Alert signal - Prepare to evacuate the building.

- (ii) Evacuation signal - Evacuate the building (do not use the lifts). Check that stairways are clear of smoke and/or fire before entering.

NOTE: Staff are not to re-enter the building until advised by Fire Brigade Staff or members of the RCA's Emergency Control Organisation that it is safe to do so.

### 7. GENERAL NOTES

- (a) When a fire button is pressed, detector or sprinkler head is activated, the Fire Brigade is automatically notified and the fire bells will ring. The Fire Brigade will normally be on the site within 4 minutes of the alarm.
- (b) It is inevitable that there will be false alarms. However, for the protection of staff and property, every alarm will be treated as real until proved otherwise.
- (c) Although smoke and fire doors close automatically under alarm conditions (to control the spread of smoke and fire) each door can be manually opened for exit and movement purposes.
- (d) Doors labelled Fire Door or Smoke Door with "Keep Closed" signs must not be propped open.
- (e) Officers are requested to ascertain the names of the fire wardens on their floor, know how they can be contacted and seek their advice on any matters relating to fire prevention, fire protection and evacuation procedures.

### 8. HINTS ON PERSONAL SAFETY

- (a) Do not panic, but move in an orderly manner.
- (b) Do not attempt to pass others or run.
- (c) Do not return for personal belongings.
- (d) In a smoke filled room or corridor keep as near to the floor as possible.
- (e) Use handrail when descending stairs; do not panic.

### GENERAL INFORMATION

#### TELEPHONE MANNER

#### COURTESY PAYS!!!

- Answer promptly
- Identify Yourself
- Speak clearly
- Have paper and pencil handy
- Show genuine interest
- Get all the facts
- Use the caller's name
- Offer assistance without resistance
- Hang up gently
- Take action

#### Remember:

- If you leave your office, arrange for someone to answer your telephone promptly, or leave a note near the telephone. Why not divert your calls to another extension?
- When answering someone's telephone, give their name and yours.
- When unable to transfer a call, arrange for the caller to be called back.

#### BEWARE!!!

#### Thunderstorms –

The telephone, in common with household electrical appliances can be a source of electric and acoustic shock during thunderstorms. The possibility of a telephone user experiencing a shock is not great. Nevertheless, users should be aware of some simple precautions to follow during thunderstorms.

- Use your telephone only for calls of the utmost urgency. Keep these calls brief.
- Whilst using your telephone keep clear of electrical appliances and metal fixtures such as air conditioners, and window frames.

### TELEPHONE DIRECTORY ALTERATIONS

To assist in the preparation and accuracy of the next internal telephone directory, could you please ensure that Miss Jenny Spilar is notified whenever there are changes to telephone extension numbers in your section as well as when related information such as location or title alters.
