BURNS :

Bitumen, Asphalt - Do not try to remove any substance adhering to skin.

Chemicals - Remove any contaminated clothing and keep flooding the burned area with CLEAN WATER.

Fire, Heat Burns Do NOT remove burned clothing or break blisters.
or Scalds

CHEMICALS IN EYE :

Keep flooding eye with CLEAN WATER

ELECTRIC SHOCK

Switch off current - or remove patient from contact with electricity, using a loop of DRY clothing, rubber or rope, or by pushing patient clear while standing on some insulating material.

PROFUSE BLEEDING

Firmly press a pad of CLEAN material directly against wound and keep steady pressure until help arrives.

SERIOUS HEAD INJURY

Support head on pillow or clothing and KEEP STILL
Give NOTHING by mouth.

SUSPECTED FRACTURE :

Do not move patient.

SUSPECTED HEART ATTACK :

Raise head and shoulders.
Loosen tight clothing.
Treat for unconsciousness (as below) if necessary.

UNCONSCIOUSNESS :

Remove dentures.
Ensure that there is no obstruction in mouth which may restrict breathing.
If vomiting, turn patient on to side.

FITS :

Remove casualty from the danger area and protect from further injury.
DO NOT restrict movements.
DO NOT prise the mouth open.
Loosen tight clothing and if possible remove dentures and place soft object between jaws.
Phone for medical assistance.

TIE LINE NUMBERS

- Officers are requested wherever possible to use the tie line numbers, followed by the appropriate extension number in preference to outside lines.
- To obtain the relevant switchboard, dial the tie line code followed by 9 (note; the operators cannot connect direct lines to extensions, you must dial again).

TIE LINE NUMBERS

Head Office	to Kew East	3
Head Office	to West Gate Freeway (Sth Melb)	4
Head Office	to Ministry of Transport	5
Head Office	to Central Depot	6
Head Office	to Dandenong Division	7

Kew East	to Head Office	8
West Gate Freeway (Sth Melb)	to Head Office	81
Ministry of Transport	to Head Office	81
Central Depot	to Head Office	1
Dandenong Division	to Head Office	50

- The direct lines should also be used for communication between the above locations. This is carried out by directing the call via the Head Office PABX e.g.
Kew East to Glen Waverley
8 (to obtain Head Office)
6 (to obtain Glen Waverley) followed by the Glen Waverley extension number.

DIRECT LINE TO DIVISIONS AND PROJECT OFFICES (For Head Office use only)

The Board's Head Office telephone equipment is now provided with automatic STD dialling to country Divisions and Seymour Project Office.

For Official calls the automatic dialling equipment now available can be activated by dialling the appropriate extension number as shown below:

OFFICE	EXT No.	OFFICE	EXT No.
Ballarat	2637 2713	Horsham	2657 2189
Bairnsdale	2643	Seymour	2658
Benalla	2645 2739	Traralgon	2659
Bendigo	2646	Warrnambool	2661
Geelong	2650 2139		

After the appropriate extension number has been dialled, a lapse of approximately 30 seconds of ringing tone will occur before an answer is received. This time is required for the automatic equipment to dial the STD number and make a connection. For technical reasons it has been necessary to programme the equipment to automatically disconnect after a period of approximately 7 to 10 minutes, and conversations requiring in excess of this time can only be continued after re-dialling.

FIRE ORDERS
HEAD OFFICE BUILDINGS

1. FIRE ALARM BUTTONS AND FIRE APPLIANCES

Fire alarm and fire fighting appliances are located on or near each staircase and additional fire alarms and appliances are sited in various parts of the buildings. Make yourself familiar with the location of those nearest to your normal workplace.

2. EMERGENCY CONTROL ORGANISATION

For each building there is a nominated Building Emergency Control Officer, Deputy Building Emergency Control Officer and Fire Wardens.

The nominated officers for this building and location nearest you are:

Building Emergency Control Officer	1	_____
Deputy	2	_____
Floor Warden	3	_____
Deputy	4	_____
Warden	5	_____
	6	_____
	7	_____
	8	_____

(In space above, please insert names of officers)

- (a) Fire wardens will assume control in all emergencies during normal office hours (8.30 a.m. to 4.51 p.m.) excluding the lunch period (12.45 p.m. to 1.30 p.m.). Staff are to co-operate with the fire wardens and comply with their instructions should an alarm be activated.
- (b) In most cases fire or smoke will be detected automatically by the detection equipment installed throughout the buildings. The fire alarm will operate under such conditions and, in turn, activate the building's warning system and set into action a train of "fail safe procedures". This system will, in turn, sound the "alert" signal and unless the system is switched to "manual" operation at the Emergency Control Centre will, after a delay of 90 seconds, sound the "evacuation" signal. Therefore during normal office hours any emergency or evacuation procedure will be controlled by officers of the Emergency Control Organisation. Outside normal office hours staff are to evacuate the building immediately if an "evacuation" signal sounds.

NOTE: Under no circumstances are the lifts to be used.

3. ALARMS

Two types of alarms may be heard in the buildings these are:-

(a) Fire bells

One or more fire bells are fitted in each building. Bells will ring if any break glass alarm, detector, or sprinkler head is activated.

(b) Warning Signals

- (i) The "alert" signal — a repetitive, interrupted tone of 420HZ to alert staff that an emergency exists or is suspected.

NOTE: The "all clear" will be given as soon as possible and will be stated verbally over the loudspeaker system.

- (ii) The "evacuation" signal — a frequency modulated tone increasing from 500HZ to 1200HZ to advise evacuation of the floor/building. (This signal will normally not be sounded during office hours.)

4. In the event that smoke or fire is detected by an individual officer, additional positive action, as detailed below, will be required.

5. ACTION BY THE PERSON DISCOVERING THE FIRE (or smoke)

- Break the nearest break glass alarm and press the button.
- During normal office hours (8.30 a.m. to 4.51 p.m.) notify a Fire Warden. (This may, or not, be possible between 12.45 p.m. and 1.30 p.m.).
- If reasonably able to, endeavour to control or extinguish the fire and on the arrival of officers of the Emergency Control Organisation (or Metropolitan Fire Brigades) carry out their instructions.
- Close all doors and windows nearby to retard the spread of fire.
- Switch off all electrical appliances and equipment.

NOTE: In the event that there is imminent danger to life, the area must be evacuated immediately.

6. ACTION BY ALL OTHER STAFF (upon hearing the fire bells or warning signals)

(a) During normal office hours (8.30 a.m. to 4.51 p.m.):

- (i) Alert signal — Fire wardens report to their respective control points, all other staff remain in their work area and await instructions from the fire wardens. Staff shall keep movement to an absolute minimum and limit the use of telephones to essential calls only.

NOTE: During lunch period (12.45 p.m. to 1.30 p.m.):

If there is an alarm during this time, fire wardens should report to their respective control points to assist in the safety and protection of members of the staff.

- (ii) All-clear — The Building Emergency Control Officer will advise staff over the loudspeakers when the emergency is over. Normal activities may then be resumed through-out the building.

(b) Outside normal office hours (including the lunch period 12.45 p.m. to 1.30 p.m.):

- (i) Alert signal — Prepare to evacuate the building.
- (ii) Evacuation signal — Evacuate the building (do not use the lifts). Check that stairways are clear of smoke and/or fire before entering.

NOTE: Staff are not to re-enter the building until advised by Fire Brigade Staff or members of the Board's Emergency Control Organisation that it is safe to do so.

7. GENERAL NOTES

- (a) When a fire button is pressed detector, or sprinkler head is activated the Fire Brigade is automatically notified and the fire bells will ring. The Fire Brigade will normally be on the site within 4 minutes of the alarm.
- (b) It is inevitable that there will be false alarms. However, for the protection of staff and property, every alarm will be treated as real until proved otherwise.
- (c) Although smoke and fire doors close automatically under alarm conditions (to control the spread of smoke and fire) each door can be manually opened for exit and movement purposes.
- (d) Doors labelled Fire Door or Smoke Door with "Keep Closed" signs must not be propped open.
- (e) Officers are requested to ascertain the names of the fire wardens on their floor, know how they can be contacted and seek their advice on any matters relating to fire prevention, fire protection and evacuation procedures.

8. HINTS ON PERSONAL SAFETY

- (a) Do not panic, but move in an orderly manner.
- (b) Do not attempt to pass others or run.
- (c) Do not return for personal belongings.
- (d) In a smoke filled room or corridor keep as near to the floor as possible.

INSTRUCTIONS ON TELEPHONE OPERATION FOR PABX

1. To make an **Internal Call**, lift handpiece. On receipt of dial tone, dial extension number required.
2. To make a **Local Exchange Call**, dial prefix 'O', on receipt of second dial tone, dial wanted exchange number.
3. **To Transfer and Receive Transferred Calls**
 - (i) Press transfer button (dial tone will be heard, if no dial tone, the call cannot be transferred);
 - (ii) Dial the wanted extension number.
 - (iii) When call is answered you can inform the person answering that you are transferring a call, replace the receiver, the call is transferred automatically.
 - (iv) Receiving transferred call '**DO NOT HANG UP**' wait for transferer to replace receiver before commencing conversation.
4. **Transferring Call Back to Switchboard**
 - (i) Incoming calls are transferred back to the switchboard by pressing, then releasing the Transfer button, then replacing the receiver (the call is automatically transferred back to the operator).
 - (ii) If you desire to speak to the operator before the call is transferred.
 - (a) press the TRANSFER button;
 - (b) on receipt of dial tone dial 9;
 - (c) when switchboard operator answers, briefly explain the circumstances, press the transfer button TWICE then replace your receiver;
 - (d) call is transferred back to operator automatically.
5. If information is required from another extension or outside number whilst an incoming call is in progress;
 - (i) see **Transfer of Calls** items (i) and (ii); and
 - (ii) at conclusion of information call '**DO NOT HANG UP**', press your transfer button and your first caller will be returned.

SPECIAL FEATURE

Incoming calls are automatically returned to the operator if not answered after 45 seconds.

DIAL TONE

In crossbar PABX equipment, dial tone must be obtained before commencing to dial.

INDIALLING

This is for the convenience of regular callers outside the Board. By using 860 followed by the extension number, a direct call can be made without going through the switchboard.

FAULTY TELEPHONES OR SERVICE DIFFICULTIES

Report to Switchboard.

DIRECTORY AMENDMENTS

Report to Office Services, Administrative Officer Extension 2583.

TIE LINES

These interconnect a number of Board Exchanges. Numbers are repeated below (also see page 3 of this directory). When making calls between applicable exchanges within the Board, officers are requested to use the tie lines.

TIE LINE NUMBERS

Head Office	to Kew East	3
Head Office	to West Gate Freeway (Sth Melb)	4
Head Office	to Ministry of Transport	5
Head Office	to Central Depot	6
Head Office	to Dandenong Division	7

Kew East	to Head Office	8
West Gate Freeway (Sth Melb)	to Head Office	81
Ministry of Transport	to Head Office	81
Central Depot	to Head Office	1
Dandenong Division	to Head Office	50

DIRECT LINE TO DIVISIONS AND PROJECT OFFICES (For Head Office use only)

The Board's Head Office telephone equipment is now provided with automatic STD dialling to country Divisions and Seymour Project Office.

For Official calls the automatic dialling equipment now available can be activated by dialling the appropriate extension number as shown below:

OFFICE	EXT No.	OFFICE	EXT No.
Ballarat	2637	Horsham	2651
Bairnsdale	2643	Seymour	2658
Benalla	2645	Traralgon	2659
Bendigo	2646	Warrnambool	2661
Geelong	2650		

After the appropriate extension number has been dialled, a lapse of approximately 30 seconds of ringing tone will occur before an answer is received. This time is required for the automatic equipment to dial the STD number and make a connection. For technical reasons it has been necessary to programme the equipment to automatically disconnect after a period of approximately 7 to 10 minutes, and conversations requiring in excess of this time can only be continued after re-dialling.

Amended 6.4.82
